Project Title: Paul Rand Website

I'd like to build this website as a multi page website. I may want to have my site navigation menu on the side. There is plenty of visual content to build a website that is almost more of a portfolio site.

- **Home Page/About** – Summarizing Rand's career and influence
- **Early Life & Education**
- **Career** – Potentially sections in one page on early and late career
- **Influences** – Movements and ideas that influenced Rand's work
- **Works** – Imagery of Rand's work with logos and other, may be broken off into sub pages
- **Sources**
